

HEAD[®]
SPORTSWEAR

OUR 23/24 WINTER COLLECTION UNDERLINES OUR PASSION FOR PERFORMANCE, INNOVATION AND FASHION. FIVE DIFFERENT LINES OFFER LOOKS FOR A WIDE RANGE OF CUSTOMERS.

We have expanded each of these lines, improved products, perfected cuts and picked up on the latest trends. On the one hand, we are working closely with our athletes such as Lindsey Vonn, Anna Veith and the freeride pros Blake Marshall and Abel Moga. On the other hand, we have also incorporated feedback from distribution, retail partners and end consumers. This is because our greatest goal is to create the perfect skiwear for everyone and to set new standards when it comes to winter sports.

Roman Stepek
Vice President Sportswear

WINTER 2023/24

LEGACY

HIGH FASHION MEETS PERFORMANCE. TOGETHER WITH EXCEPTIONAL ATHLETE LINDSEY VONN, WE ARE WORKING ON THE CONSTANT EXPANSION OF THE LEGACY LINE AND WILL BE PRESENTING SEVERAL NEW INNOVATIONS IN WINTER 23/24:

New, trendy styles, bags, shiny metallic fabrics, patchwork prints and a fashionable color chart featuring off-white, black, light blue and red are increasingly blurring the boundaries between slopeside and city looks. A small leather capsule collection with a water-repellent finish brings a whole new luxurious style to ski resorts. And, in very special news, a Men's LEGACY Line will also be available for the first time. The five-piece collection is sure to impress with its soft 2-layer and 3-layer fabrics and a sporty casual look.

INTRO

THE REBELS LINE LIVES UP TO ITS NAME IN WINTER 23/24 AND MIXES UP THE PISTES WITH A RANGE OF EYE-CATCHERS. THE BIKER-INSPIRED STYLES ARE JOINED BY SPORTY PIECES, CREATING A VERY DIVERSE COLLECTION.

Technically sophisticated products are given an urban update with fashionable details such as fake fur inner collars, metallic fabric accents or genuine leather. The color palette is varied with bright blues and greens, rich reds and pinks as well as earthy browns and greens. Waistcoats, shirts and woolen jumpers also make the casual REBELS look street-ready.

REBELS

KORE

INTRO

TOGETHER WITH OUR FREERIDE PROS BLAKE MARSHALL, ABEL MOGA AND MEREDITH EADES WE ARE CONTINUOUSLY WORKING ON THE KORE LINE TO DESIGN THE PERFECT OUTFIT FOR YOUR NEXT ADVENTURE IN THE SNOW.

Innovative fabrics, technically sophisticated material mixes and well thought-out features are sure to defy the elements on the slopes. In addition to the classic Freeride KORE Jacket and the KORE II Jacket designed for touring, a longer cut Nordic Jacket and a versatile Hybrid Jacket will be added to the collection in winter 23/24. The general color chart of black, orange and thyme is complemented by a fresh light blue for the ladies.

THE RACE LINE REFLECTS THE HEAD DNA - SKI RACING. THIS IS WHERE WE APPLY OUR CORE EXPERTISE AND MAKE CLEAR STATEMENTS. WE DESIGNED THIS LINE FOR ALL AMBITIOUS SKI RACERS.

Our RACE Line shines in a new color: Arctic blue. Bright blue tones give the collection a fresh kick and underline its sporty character. The structure of the collection will remain unchanged. Outfits for racers and service teams underline that performance and technical ability are in our DNA. Robust materials, lightweight padding and practical features support racers and service teams during their challenging performance on the mountain.

RACE

PORSCHE

INTRO

OUR COLLABORATION WITH PORSCHE GOES INTO ITS SECOND ROUND. THE INSPIRATION FOR THE MEN'S OUTFIT WAS THE COLOR SCHEME OF THE ROTHMANN PORSCHE. THE MAIN COLORS ARE BLUE AND WHITE, WHILE GOLD AND RED TAPES ADD THE HIGHLIGHTS.

The three-piece outfit consists of the PrimaLoft padded Porsche Ski Jacket, a lightweight Ski Midlayer jacket and the casually cut Porsche Ski Pants with taped seams and warming PrimaLoft insulation. The gold and red tapes lend the styles their familiar racing driver look and again underline the passions associated with Porsche: Performance and speed.

COLOR CONCEPT

INTELLIGENT APPAREL MEMBRANE

High-performing, intelligent membrane designed to optimise breathability and comfort. With a breathability of 20,000 g/m²/24h and a water column of 20,000mm, the membrane offers reliable water resistance and unique climate management.

MOISTURE TRANSFER MICROFIBRE

These high-performing microfibres move sweat to the surface of the material where it is efficiently removed. This allows the material to dry quickly.

PRIMALOFT®

PrimaLoft® is the world's leading manufacturer of insulation materials. The synthetic fiber insulation made of polyester is known for its outstanding thermal performance which has similar thermal properties to down insulation. All PrimaLoft® products comply with Oeko-Tex Standard 100 and most products are also Bluesign® certified.

SCHOELLER

Schoeller Textil AG, headquartered in Switzerland, specializes in the sustainable development and production of innovative textiles and textile technologies.

SCHOELLER®-WB-400

We use classic WB-400 softshell technology in our jet pants and overall from the LEGACY Line. This fabric combines two textile surfaces with a highly breathable coating. The coating in the middle provides additional protection from wind and water. Therefore, these softshell fabrics are suitable for weather protection, as they are wind- and water-repellent and also exceptionally breathable.

SCHOELLER CERASPACE™

The high-performance protective fabric ceraspace™ offers an excellent level of abrasion protection which makes it ideal for protective workwear, among other applications. The protective properties are achieved due to the structure formed of extremely hard ceramic particles. This special ceramic material is almost as hard as diamond. We use ceraspace™ technology to provide cut protection on the inner leg of our trousers and occasionally on shoulder areas.

TAPED SEAMS

Seams are a weak point on clothing where moisture and wind can penetrate. That is why the seams on the inside of our products are sealed with tape. This tape is machine-welded onto the seam and closes it completely. We make a distinction between “fully seam taping”, where all seams are closed, and “critical seam taping”, where only seams that are in critical places, such as the shoulder area, are closed.

STRETCHABLE FABRIC

We use various fabrics that exhibit stretch characteristics. This includes knitwear, which is elastic due to the knit, and woven fabrics, which become stretchy thanks to their woven construction or the addition of spandex. We distinguish between fabrics that are stretchable in two directions (2-way stretch fabric) or in four directions (4-way stretch fabric).

100 % PFC FREE

Textiles in the outdoor sector are treated with a chemical finish (durable water repellency - DWR) to make them water- and oil-repellent. Fluorocarbon compounds, which are also called per- or polyfluorinated chemicals (PFCs), are usually used for this purpose. These chemicals are controversial because of their harmfulness to both human health and the environment. At HEAD Sportswear, we are striving to convert all fabrics treated with DWR to become PFC-free in the long term. This enables us to protect people and the environment.

REAL DOWN

Our down is obtained as a byproduct of the food industry and does not come from live plucking or force feeding farms. We communicate this through an extra card attached to the corresponding products' hangtags.
